

Prasaswo Tri Prastowo, S.Kom

DEVOPS / INFRASTRUCTURE ENGINEER

Yogyakarta, Indonesia · Margoagung, Seyegan, Sleman

Born 16 September 1987

01 / PROFILE

DevOps and infrastructure professional focused on reliable application delivery, Linux server operations, containerized workloads, CI/CD automation, observability, and production infrastructure. Experienced in operating self-hosted platforms and building practical, maintainable deployment workflows across development, staging, and production environments.

02 / CORE CAPABILITIES

- **CI/CD & Automation** — GitLab CI/CD, deployment pipelines, release workflows
- **Container Platform** — Docker, Compose, image lifecycle and registry operations
- **Linux & Web Stack** — Ubuntu, Nginx, PHP-FPM, SSH, system administration
- **Infrastructure** — Proxmox, OpenStack, VM operations, storage and networking

03 / OPERATIONS & RELIABILITY

- **Observability** — Prometheus, Grafana, cAdvisor, Uptime Kuma
- **Database Infrastructure** — PostgreSQL, Patroni, HA/replication concepts
- **Security** — Vault, SSH hardening, Fail2ban, secrets and access management
- **Object Storage** — RustFS / S3-compatible storage and backup planning

04 / TECHNICAL STACK

SOURCE & CI/CD	INFRASTRUCTURE	OBSERVABILITY
Git · GitLab CE · GitLab CI/CD · SSH	Ubuntu · Proxmox · OpenStack · Docker	Prometheus · Grafana · cAdvisor · Uptime Kuma
PLATFORM	DATA & STORAGE	WEB & SECURITY
Docker Compose · Watchtower · Nginx · PHP-FPM	PostgreSQL · Patroni · RustFS · S3	Vault · Fail2ban · TLS · Linux hardening

05 / PROFESSIONAL EXPERIENCE

DevOps / Infrastructure Engineer · Enterprise Environment · 3+ years

- Manage Linux-based production and staging infrastructure, including VM lifecycle, system configuration, networking, storage, and service availability.
- Design and maintain CI/CD workflows using GitLab, including self-hosted GitLab CE, runners, private container registry operations, and SSH-based deployments.
- Operate Docker-based application platforms and deployment workflows, including image management, Compose services, Watchtower-based updates, and production-safe cleanup procedures.
- Build and maintain observability using Grafana, Prometheus, cAdvisor, and Uptime Kuma for infrastructure, application, and availability monitoring.
- Support highly available PostgreSQL infrastructure using Patroni and streaming replication, with operational focus on cluster health and failover readiness.
- Maintain web application infrastructure using Nginx, PHP-FPM, TLS, SSH access controls, secrets management, and Linux security tooling.
- Plan infrastructure capacity, storage growth, backup strategies, log rotation, and operational procedures with emphasis on minimizing production risk.

06 / SELECTED INFRASTRUCTURE SCOPE

DOMAIN	EXAMPLES OF RESPONSIBILITY
CI/CD & Source Control	Self-hosted GitLab CE, runners, private registry, pipeline automation, deployment keys and environment-specific releases.
Container Platform	Docker / Compose workloads, Watchtower, image cleanup, registry authentication and operational troubleshooting.
Database HA	PostgreSQL + Patroni cluster operations, streaming replication, PgBouncer monitoring and HA readiness.
Monitoring	Grafana dashboards, Prometheus metrics, cAdvisor, Uptime Kuma and operational alerting.
Storage	RustFS / S3-compatible object storage, Linux filesystem expansion and backup architecture planning.

07 / EDUCATION

Universitas AMIKOM Yogyakarta S1 — Teknik Informatika Graduated 2011	Academic Focus Information Technology · Software Engineering · Systems & Infrastructure
--	---

08 / PERSONAL INFORMATION

Full Name	Prasaswo Tri Prastowo, S.Kom
Date of Birth	16 September 1987
Address	Margoagung, Seyegan, Sleman, Yogyakarta, Indonesia

Portfolio companion CV — concise, infrastructure-focused, and intentionally minimal.
